Customisable

-40º ~ +105º C

IP69K Up to

Vibration & Shock Proof

TUFF Cables by Motium are a range of rugged, reliable cables designed to last in the harshest environments. Motium's range of rugged cables are high quality and are designed for longevity and ease of use.

At Motium, customisation is standard, so our TUFF Cables can be customised to fit your rugged technology requirements.

Key Features

Bespoke and Customisable
Make custom changes to our standard cable range or work with our specialised team of engineers to design a truly bespoke cable, from colours, materials, lengths, connectors and beyond.

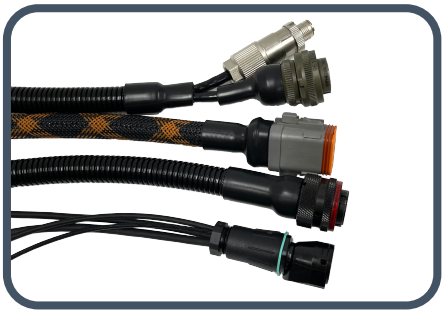

Designed for Rugged Environments
Rated up to IP69K, Motium's TUFF Cables are able to withstand extreme heat, dirt and dust, and high pressure water spray in the harshest of environments.

Built to Last
Motium's rugged cables last longer and will remain operational for years to come, reducing in-field interruptions and down time.

TUFF and TUFF+ Range Support
TUFF Cables seamlessly integrate with and support all other products in our TUFF and TUFF+ ranges.

Eco-Friendly Packaging
Cable labels and packaging are plastic free.

Customised Solutions
Designing and manufacturing our own technology means we can tailor our products to your specific needs. From white label customisation through to custom hardware and beyond, contact us for a truly bespoke TUFF solution.

Ongoing Support
We create strong, long-lasting partnerships with our customers. We offer comprehensive and ongoing support and guidance for effective installation and efficient use of all products.
